Abstract

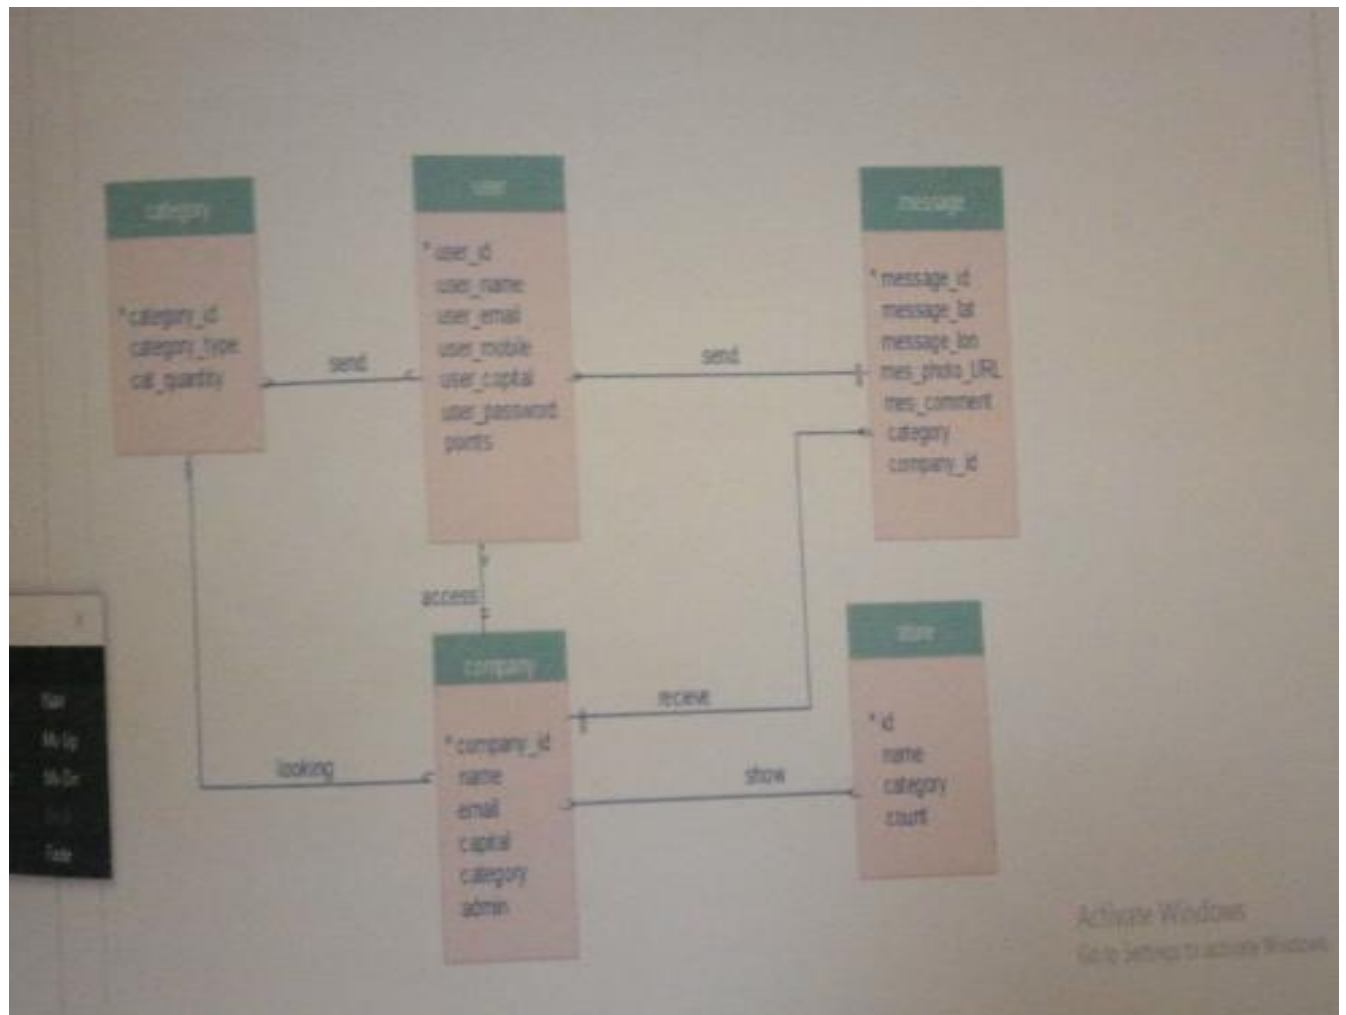

- *Mobile Application that has ability to clean our state by using mobile camera that better, faster and helpful to user. Our application clean our street and organize all garbage in our street by using mobile camera.*
- *so this application can be used as a reporting tool, where everybody at everywhere can be used to clean the street and recycling it.*
- *There point system to evaluate the users that give them gifts and money depend on how help us.*

Analysis:

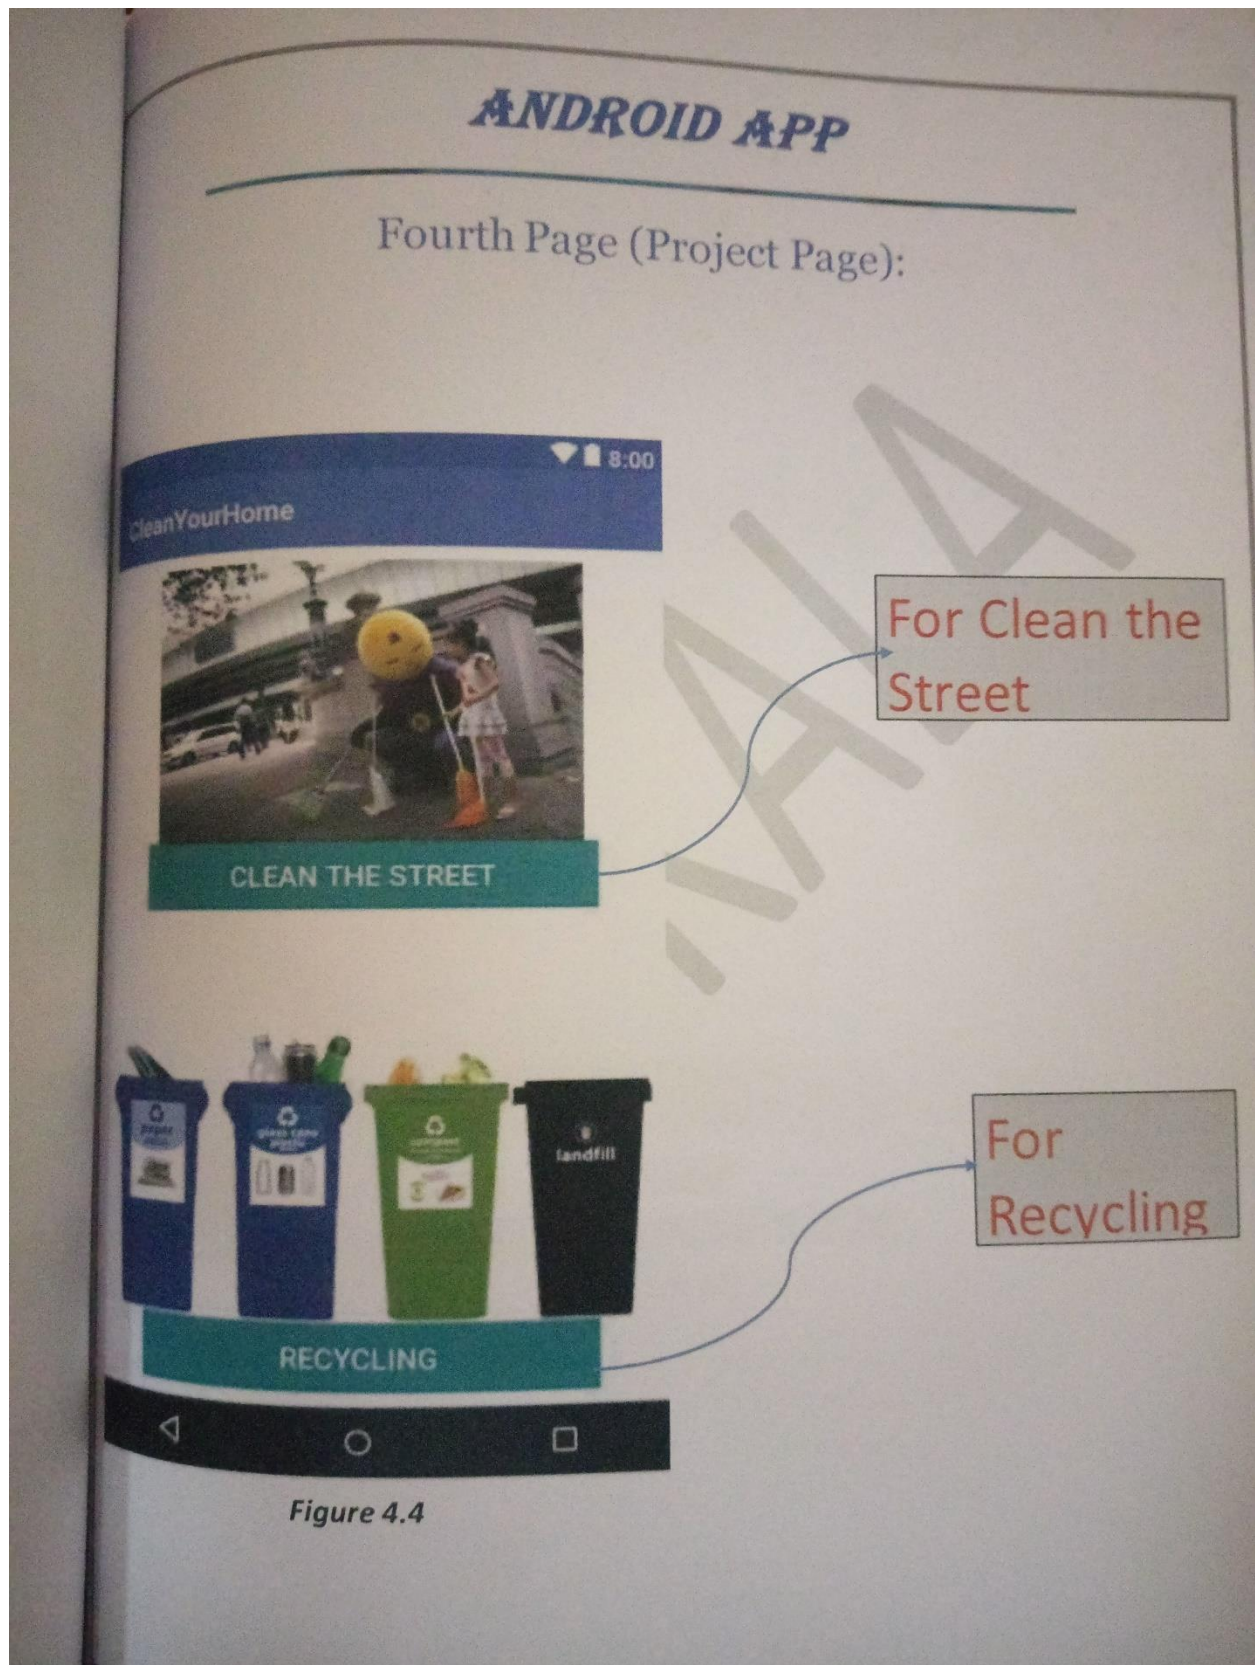

Use Case

ER Diagram

Implementation

Fifth Page (Clean the Street Page):

The screenshot shows the 'CleanYourHome' app interface. At the top, there's a blue header with the app name and status icons. Below the header is a camera icon with a callout 'Take Photo.'. Underneath is a list of material types with checkboxes: Brass, Aluminium, Copper, Tyre, Black Polythene, Cloth, Paper, Plastic, and Other. To the right of this list is a column of input fields, each labeled 'small' with a callout 'Enter The Quantity.'. Below the list is a text area with the placeholder 'Write your Report' and a callout 'Write Your Comment.'. At the bottom is a blue 'Send' button with a callout 'Send Button.'. The entire interface is set against a light gray background with a large, faint 'A' watermark.

Type	Quantity
<input type="checkbox"/> Brass	small
<input type="checkbox"/> Aluminium	small
<input type="checkbox"/> Copper	small
<input type="checkbox"/> Tyre	small
<input type="checkbox"/> Black Polythene	small
<input type="checkbox"/> Cloth	small
<input type="checkbox"/> Paper	small
<input type="checkbox"/> Plastic	small
<input type="checkbox"/> Other	small
